

As a recent customer of Far Star, Inc., it is with great pleasure that we write this letter of reference.

The scope of our project entailed engineered drawings, a new addition to our 35-year-old log home, building a garage and completely resculpting a steep hillside for a driveway.

We were extremely satisfied in our entire experience with Far Star, Inc. owner Steve Crook, and his crew of specialists. Steve was professional in every aspect and detail of our business relationship. He personally took care of procuring the necessary permits and inspections; our contract and drawings were detailed and specific, leaving no questions throughout the project's timeframe; Steve was good to his word, cognizant of every budgetary detail, and kept a designer's eye on the process in every way.

Steve's groups of specialists included roofers, framers, log builders, concrete crews, stone masons, plumbers, painters, and installers of tile, hardwood, carpet and vinyl. Every person involved was courteous and professional and often went out of their way to adjust to special circumstances.

We are so pleased with how beautiful and renewed our log home became! We are certain that when you choose Far Star, Inc. for your building and construction needs, you can rest assured that your project is in the best of professional hands.

Sincerely,

Dennis Schmuker and Rita Garren
